About ERP

The ERP of the University is Web based platform dedicated for e-governance of the University, that facilitates transparency in all dimensions of University i.e are Admission, Academics, Administration, Examination, Learning Resources, etc.

Integral part of ERP is University LMS, those provisions, e-learning activities in the field of Engineering, Management, Science, Humanities, Architecture, Design, Arts, commerce, Hotel Management and Public Health. This LMS provides a wide variety of opportunities, resources, and new strategies for online education and training.

The University ERP is secured with login access to respective stakeholders, that have 6 modules,

A. 4th module the Admission process is handled through NPF (No Paper Forms) module, where the two separate sections exist which cater to University Administration (Faculty) & Prospective students.

Registrar Poornima University 15-2027 To 2031 IS-2027 To 2031 Ramchandrapura, Stapura Extension JAIPUR-303905 (Rajasthan)

Admission Management

Introduction:

University has its Automated Admission Management System using Web based software namely No Paper Forms (NPF) to manage the complete admission procedures of various Schools/departments of a University. Prior to year 2015 the process of admission, notice boards, important declarations about academics and administrations are being carried out manually through paper and pen which is very time consuming and really a big headache to maintain all that record at some place. This paper-pen process has been not only time consuming but also inefficient and it's difficult to maintain the paperwork and the records. Through this software we are trying to overcome the problem of maintaining paper based records and focusing on the digital library. In addition to record based technology, we would be sending pushing notifications given by the institutes and the very same portal would be again used to notify the students and even the parents about the announcements digitally.

Ensuring to resolve all the above points use of web tool which is implemented using web-services that would connect with the database established on a remote server has been utilized for the purpose of smooth handling and transparency in all departments of admission process

Every student gets a Registration ID (a Unique UID) that last for the student, till he is part of the system and both student & administration can vouch for the process. All the records of the students can also be maintained on the system

The Admission Portal has two dimensions of users, 1st the stakeholder is the University and seconds the student. Both of them are provided, separate interfaces and panels for tracking the progress of work by them

The University administration panel provides, a Dashboard rich with all information pertaining to all the leads, admitted students, record maintenance, quality & diversity analysis and alerts for pending documents/processes. The screenshots for the administration system are given below
